Be Sure to See:*

RAILROADS IN BUILDING

The Story of Railroad Construction

A comprehensive array of diorama and motion models, forming a graphic picture of the weaving of the railroad web of America.

RAILROADS AT WORK

The Story of Railroad Operation

To form this picture of a typical American railroad, a scale-model 160 feet in length and 40 feet in depth, with 3,800 feet of track, 50 locomotives and 400 cars, has been built in an auditorium seating 1000 persons. Every hour there is enacted an entire day's operations of a modern railroad in all its varied detail — the enthralling drama of railroading today!

RAILROADS ON PARADE

The Romance of the Railroad

A huge dramatic spectacle with a cast of 250 men and women, 50 horses, and 20 locomotives, old and new — operating under their own steam — on the largest stage ever built in New York, facing an amphitheater seating 4000. Four performances daily except Monday at 12.30 P. M., 2.00 P. M., 3.30 P. M. and 5.00 P. M., Daylight Saving Time. General admission 25c.
